

DE NOOD® DREISCHOR

The Dreischor light luminaire gets its name from a special historic village on Schouwen-Duiveland in the Dutch province of Zeeland. Because it was not possible to place street lights on poles in the narrow streets, it was decided at the time that the street lighting in this village should be placed using wall brackets on the front facades of the houses. This method of attachment is therefore the characteristic feature of the Dreischor model.

STANDARD VERSION

PRODUCT SPECIFICATIONS

- » Material: copper
- » Top button material: bronze
- » Material for the lower buttons: brass
- » Glazing: clear polycarbonate
- » Weight: 15 kg
- » Dimensions: 86 cm x 35 cm
- » Intended for outdoor use

LIGHTING TECHNOLOGY

- » E27 ceramic fitting on the bottom
- » Suitable for LEDs
- » Suitable for incandescent bulbs
- » Suitable for energy-efficient bulbs

QUALITY LABEL

CREATE YOUR OWN DE NOOD®
